CERTIFIED CENTRAL VACUUM An Innovative Way to a Cleaner Home

Living the Condo Lifestyle epitomizes the freedom to come and go as you please, with minimal maintenance. Create a healthier, cleaner environment with a little help from Certified Central Vacuums (CCVI) and experience a sense of well-being that comes from breathing easy.

WE LIVE IN A WORLD where we expect to get things done with relative ease, be it at home or elsewhere. For those who choose to live in a condo, there is the unparalleled comfort of knowing things will get done when one is away for extended periods of time. And who doesn't want the convenience of a cleaner home and air particularly if you spend more time indoors with winter looming soon? So it makes perfect sense one appliance to install should be a central vacuum.

But along with the touted advantages of condo living, one of its constraints is a space limitation, so choosing a central vacuum system for your condo can be tricky. "There's a range of central vacuum products and accessories in the market so it can be downright confusing to a homeowner which one to buy," says Elaine Coates, president of Certified Central Vacuums Inc., (CCVI). If you've ever tried a regular vacuum, you know it can be heavy to lug around and you've probably dented a wall or two by maneuvering the monster that belches dust and leaves behind that "just vacuumed smell," which in reality are microorganisms such as mould, dust mites and allergens.

CCVI, a business member of the Calgary Region Home Builders Association (CRHBA) and the CRHBA's Renovator's Council, specializes in central vacuums, and takes the confusion out of which central vacuum to

choose whether one lives in a condo or a new home. "For those who live in downtown condos, CCVI has the Cubby Vac, a self-contained vacuum cleaner for space limited applications," says Coates. The Cubby Vac can be installed in a typical 16-inch by two-inch by four-inch wall.

The Cubby Vac is an innovative and contemporary central vacuum designed for new and existing homes. "It's much quieter and cleaner than a portable vacuum that you pull around that hums right at you," says Coates. What makes

"THE CUBBY VAC IS A SELF-CONTAINED VACUUM CLEANER FOR SPACE LIMITED APPLICATIONS."

the Cubby Vac unique is that it has a motor driven 55-foot retractable hose with a switch at the convenience of your thumb and fits into a wall space. "It's got a very powerful motor and a high quality four-layer bag that filters the air by remov-

ing 99 per cent of germs and allergens. Everything fits into one small space," says Coates.

The amazing Cubby Vac can cover and service condos anywhere from 600 to 3,600 square-feet. The Cubby Vac suits the lifestyle of young professionals who want a streamlined and efficient central vacuum. "The Cubby Vac is compact and clean but at the same time is cost competitive," says Coates.

The Cubby Vac is unique to Calgary and can be sourced through Certified Central Vacuums exclusively. CL
